Profile

Software Engineer with 2+ years of experience developing and maintaining web applications using React, Next.js, TypeScript, and NestJS. Skilled in frontend and backend development, REST API integration, debugging, and implementing scalable application features. Experienced in collaborating with cross-functional development teams.

Work Experience

Sprobe Inc. | Jul 2024 - Current

Junior Software Engineer

- Contribute to the development, maintenance, and enhancement of existing web applications.
- Implement user management, form enhancements, validations, and REST API integrations.
- Troubleshoot application issues and collaborate with QA and development teams to deliver fixes and improvements.

Sprobe Inc. | Feb 2024 - May 2024

Software Engineer Intern

- Collaborated with a three-member development team to enhance an existing web application.
- Implemented a calendar booking feature with event scheduling, color-coded entries, descriptions, reminders, and locations.
- Integrated new functionality into the existing codebase.

Education

University of Cebu | Aug 2020 - Jun 2024

Bachelor of Science Information Technology

Projects

Foreign-Worker Recruitment & Immigration Management Platform

Next.js, React, TypeScript, Node.js, ArangoDB | 2025– Present

- Developed and maintained personnel, workplace, and role-based user management features with frontend and backend integration.
- Enhanced PDF and Excel document generation, resolving autofill, formatting, data mapping, and multilingual rendering issues.
- Implemented search, filtering, form validation, and notification functionality.
- Investigated and resolved bugs based on QA/UAT feedback to improve application reliability.

AI-Assisted Business Continuity Training Platform

React, JavaScript, Material UI, Laravel, PHP, MySQL, Docker | 2024 - 2025

- Developed responsive interfaces for training sessions, evaluations, dashboards, and administrative features.
- Improved PDF report generation by fixing pagination, text overflow, image sizing, and missing content.
- Implemented English/Japanese localization and group administration features across frontend and backend.
- Enhanced training usability, API functionality, and security through bug fixes and feature improvements.
